CARCINOMA BREAST
Inv 1
Mammography
size & location of lesion
micro calcification= malignancy
irregular soft tissue shadow
spiculations
USG
solid
cystic
FNAC
Frozen section
receptor status
invasion
grading
Tru cut
Excision biopsy
USG abdomen
liver 2ndries
ascitis
krukenberg tumor
CXR
pleural effusion
cannon ball 2ndries
medistinal lymph nodes
2ndries rib
XRay spine
osteolytic lesion
Inv 2
Oestrogen receptor study
ER +ve
prognosis
tamoxifen good response
response to treatment
ER -ve
prognosis
hormone therapy not beneficial
response to treatment
study of discharge from nipple
MRI breast
scar from recurrence
management of axilla + recurrent disease
Edge biopsy
Tumor marker
CA 15/3
Sentinel node biopsy
Triple assessment
clinical
radiological
cytological
